

A new river service linking Le Havre, Rouen and Gennevilliers: Fluviofeeder steps up its presence on the Seine Axis

Fluviofeeder, a subsidiary of the MARFRET group,

started a direct river service between Le Havre and Gennevilliers on 1 November last.

▶▶ The new service, available to all categories of customer, will contribute to the development of HAROPA PORT's multimodal offering with reliable, ecological and competitive river transport solutions along the Seine Axis. Thanks to mass maritime freight transport it helps reduce the carbon footprint of port activities and relieves road traffic congestion.

Details of the new Fluviofeeder offering

 A direct weekly service with round trips linking Gennevilliers, Rouen and Le Havre, provided by the barge *Magister* according to the following schedule:

Gennevilliers	Rouen	Le Havre	Rouen	Gennevilliers
Monday	Wednesday	Thursday	Friday	Monday
Gennevilliers terminal	Container and general cargo terminal	Atlantic and Americas Quays	Container and general cargo terminal	Gennevilliers terminal

 Capacity of the barge *Magister*:
126 TEU

 An environmentally friendly transport offering

▶ This service supplements the semi-weekly shuttle service operated by Fluviofeeder between Le Havre's Port 2000 terminals and the SOMAP terminal in Rouen.
