

HAROPA PORT strengthens its service offering to the Caribbean and South America's west coast

Le Havre is back in a position as last Northern European export port of call on the rotation of the regular service to the Caribbean and the west coast of south America.

The operators of this service are CMA CGM (EUROSAL), Cosco Shipping (EWX) and Hapag-Lloyd (SWX).

The first call at Le Havre is scheduled for 2 September at North Terminal, Americas Quay.

The inclusion of Le Havre in the new organization of the service and its position as the rotation's last Northern European port of call for exports represents a real opportunity for HAROPA PORT customers, who will benefit from highly competitive transit times to the Caribbean and South America's west coast.

Details of the **EUROSAL / EWX / SWX** service
